

# FIBRESTAR DRUMS

The UK's largest producer of environmentally sustainable fibre drums and packaging solutions

## LEVERPAK DRUMS

Leverpak drums are suitable for packing powder, solid, semi-liquid and hazardous products. Strong and versatile, they will protect your product in the most cost effective manner.

Internal linings and barriers incorporated into the drum sidewall will provide enhanced protection for your products by extending shelf life and reducing the need for additional loose liners.

Drums printed with your company logo, brand names and product information will help to re-enforce your corporate image, as well as potentially reducing labelling costs.

- Full UN approval to packaging groups I, II and III (solids).
- Re-useable, re-cyclable and thermally recoverable.
- Moisture protection barriers available, allowing outside storage.
- Low tare weight, resulting in lower transport costs
- Suitable for packing:
  - Powders
  - Granules
  - Pastes
  - Solids
  - Semi-liquids
  - Hazardous products

## Pay-Off-Pack

Drums fitted with an inner core to allow the bulk packing of welding, ferrous and coated wire, are ideal for feeding machinery and processes requiring continuous or long duration supplies of wire. Fewer machine changeovers, less downtime and greater production efficiency will be achieved by using Pay-Off-Paks.

Snag-free dispensing by incorporating a unique wire retention and control system is another added benefit.

## Printing and decoration – Fully customisable

Drums printed with your company logo, brand names and product information will help to re-enforce your corporate image, as well as potentially reducing labelling costs.

# Features of the **LEVERPAK** range of high performance fibre drums

Electrogalvanised closure band incorporates safety edges for added protection.

Full open top (FOT) opening for easy filling and removal of product

Product protection to UN Packaging group I, II, and III (Solids) Standards.

Special protection barriers and adhesives incorporated into the sidewall, offer moisture protection and outside drum storage capability.

Electrogalvanised chimb bands provide further impact strength.

Plastic lid for improved strength and storage capacity. Gasket available for more effective seal.

Decoration by printing or painting helps to promote company and product image.

Maybe re-used, recycled and thermally recovered. Disposal should take any relevant legislation into account
