

Fibre Drum Features

PATTERN 3

Pattern 3 drums are suitable for packing powder, solid, semi-liquid and hazardous products. Lightweight and versatile, they will protect your product in the most cost effective manner.

Internal linings and barriers incorporated into the drum sidewall will provide enhanced protection for your products by extending shelf life and reducing the need for additional loose liners.

Drums printed with your company logo, brand names and product information will help to re-inforce your corporate image, as well as potentially reducing labelling costs.

UN approval for transportation of dangerous goods.

Low tare weight means savings on transport costs.

Fully recyclable and made from renewable fibre resources.

Electrogalvanised chime band provides further impact strength.

By supplying drums loose, stretchwrapped or palletised, Fibrestar Drums will match your bespoke handling and delivery requirements.

Fibre slip on lid available for all sizes of drum
Decoration by printing or painting helps to promote company and product image.

Black plastic slip on lid available on 355 diameter drums.

A range of internal linings including polythene, polyfoil, polypropylene and silicone are available for maximum product protection and release properties.

Product protection to UN Packaging Group II and III (Solids) Standards.

Decoration by printing or paint coating helps to promote company and product image.

Varnish outer-wrap available for easy wipe-down'

Available in six diameters.

Drum heights from 195mm to 1000mm.
